

Laptop Prep for “Hands-on: Introduction to Text Analytics with Python”

Overview

Laptop preparation for the class consists of five steps, with detailed instructions below:

1. Download course files from GitHub
2. Installation of Anaconda Python
3. NLTK downloads.

NOTE – Administrator permission may be required to complete laptop prep. Also, often it is necessary to disable anti-virus software to allow for the installation. As such, disabling any anti-virus is recommended before laptop prep. Lastly, installing the latest version of Anaconda Python is recommended – even if you have Python already installed.

The GitHub repository with all required course files is located here:

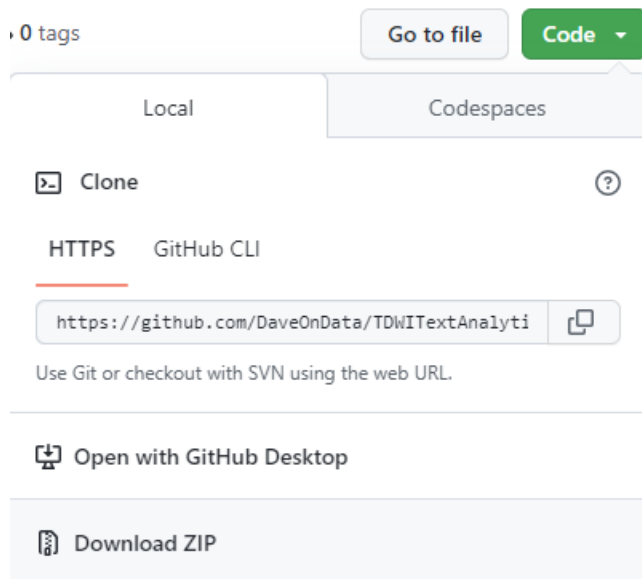

- <https://github.com/DaveOnData/TDWITextAnalyticsWithPython>

Hardware Requirements

1. Windows or Mac OS X preferred (instructors have no experience with Linux)
2. 64-bit operating system
3. 8GB of RAM, 16GB preferred
4. 4GB of free drive space

Step 1 - Download the files from GitHub

1. Within the GitHub repository page, click on the “Code” button and select “Download ZIP”:

2. Copy the file folder within the downloaded ZIP to a well-known location on your laptop (e.g., the Desktop):

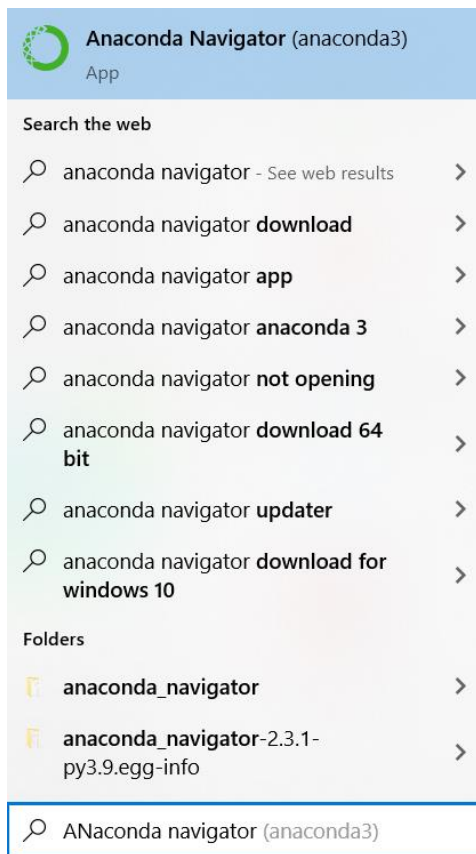

3. Open the file folder. You should see the following files:

Step 2 – Anaconda Python Installation

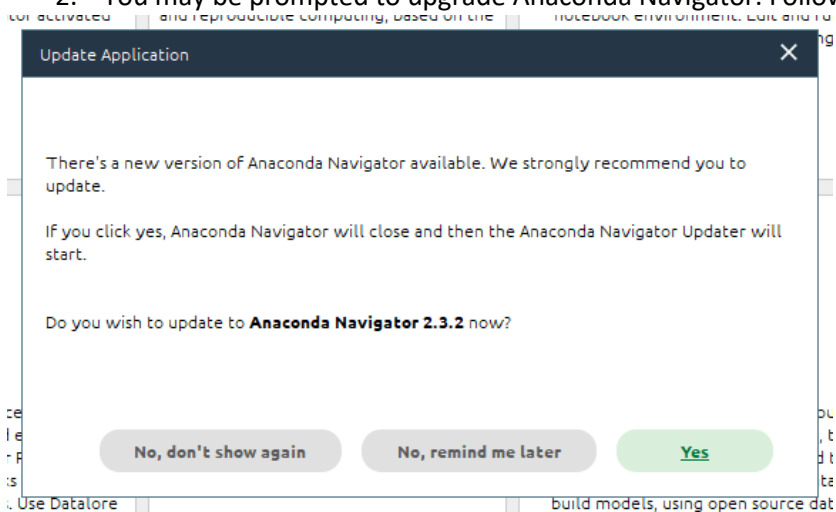

1. Open your browser and navigate to: <https://www.anaconda.com/products/distribution>
2. Click the download button.
3. When the installer has downloaded, follow the instructions (accept defaults) to complete the installation.

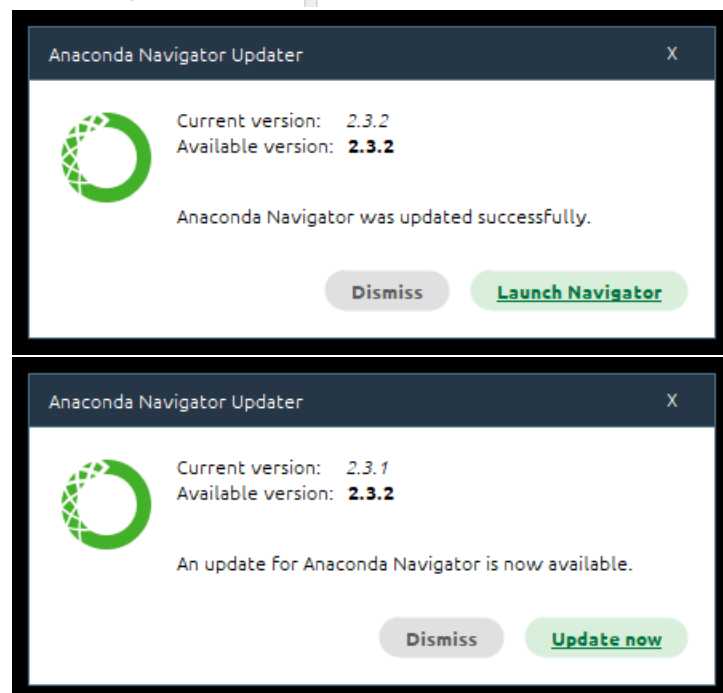

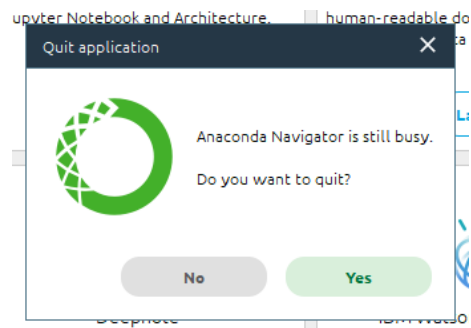

Step 3 – NLTK Downloads

1. With Anaconda Python installed, start the Anaconda Navigator application:

2. You may be prompted to upgrade Anaconda Navigator. Follow the dialogs to do so:

3. If needed, relaunch Anaconda Navigator

4. NOTE – Your Anaconda Navigator window might not look exactly like the following. Within Anaconda Navigator, launch Jupyter Notebook:

5. asasdsad

Congratulations! You are now ready for the class!
